MIDMOS

ECO FRIENDLY PRODUCTS TO MANAGE
BED BUG PROBLEMS

BED BUG POPULATION DYNAMICS

OVER A PERIOD OF 180 DAYS,
UNCHECKED, ONE MALE ADULT
FEMALE BED BUG RESULTS IN:

7,848 ADULTS
121,449 NYMPHS
69,909 EGGS
169,490 BYTES

www.bedbugsalert.com

INCREASED OCCUPANCY. INCREASED RISK OF BED BUGS.

BED BUG MONITORING FOR EARLY DETECTION

INTRODUCING BB ALERT® MONITORING SYSTEM

Effective management of bed bug
problems requires early detection,
and quick action.

BB ALERT® is a pesticide-free, pre-verified bed
bug monitoring system, and has been
designed based on the biology of bed bugs.

The system has two component parts:

BB ALERT® Action:
Proactively alert you to bed bugs
looking for a steady meal.

BB ALERT® Position:
Provides an ideal, high-traffic area for
bed bugs that have had a blood meal.

Benefits of BB ALERT®:

- Pesticide-free monitoring
- Non-invasive detection
- Bed bug treatment ready
- Pre and post-infestation monitoring

BED BUG ELIMINATION FOR SENSITIVE ITEMS

INTRODUCING BB ALERT® OZPM

BB Alert® OZPM is an eco-
friendly and pesticide-free
technique for the elimination of Bed
Bugs from sensitive items.

OZPM works by placing items inside a sealed
bag and removing the oxygen from inside -
starving any bed bugs living within the item of
the necessary oxygen to live.

OZPM is ideal for use to treat the following
items and areas:

- Mattresses
- Electronics, items, etc. (HIFI)
- Delicate soft furnishings
- Clothing
